PROFILE SUMMARY

I am a Norwegian Master's student in Artificial Intelligence at Queen Mary University of London, with a Bachelor's degree in Computer Science from the University of Kent. Through internships at ABB and OneSubsea, I have gained experience in software development, technical systems, and cybersecurity in applied environments. I am particularly interested in machine learning and data driven systems, with a focus on applying AI methods to real world problems. My upcoming master's thesis focuses on applied natural language processing and large language models, including retrieval augmented generation and analysing model behaviour in practice. I am motivated by understanding how models behave in real systems and building solutions that work reliably.

WORK EXPERIENCE

SUMMER INTERN

OneSubsea | Bergen, Norway

June 2024 - August 2024

- Assisted the Process and Control System Engineering team with cybersecurity responsibilities.
- Supported engineers with documentation, monitoring, and improvements to ensure compliance with cybersecurity standards.

SUMMER INTERN

ABB | Bergen, Norway

June 2023 - August 2023

- Worked in the Telecom Engineering department, supporting digital tool development and process improvement.
- Developed a user-friendly web application with QR-code scanning and Optical Character Recognition.
- Identified inefficiencies in delivery logistics and suggested solutions to improve organisation and workflow.

GENERAL MANAGER

Sol Nesttun AS | Bergen, Norway

May 2020 - June 2021

- Managed daily operations and ensured a positive customer experience.
- Communicated with customers, handled feedback, and identified areas of improvement.
- Implemented marketing solutions to enhance the overall experience through marketing strategies.
- Responsible for transaction accuracy, and financial routines.

EDUCATION

Queen Mary University of London

2025 - 2026

MSc Artificial Intelligence

University of Kent

2021 - 2024

BSc Computer Science

VOLUNTEERING

- Women in STEM – Vice President
- Canterbury Homeless Outreach
- Kent Uni Boob Team

SKILLS

- **Programming Languages:**
Python, PyTorch, C#, C++, SQL, Java, JavaScript, HTML, CSS
- Web Design, Web Development
- Teamwork following agile methodologies
- Customer Service
